

**Return
on Investment
<1 year**

**Replace your old installation
with LED and save 65%.**

**The payback period is now
comfortably under 1 year!**

OPPLE Lighting offers a wide range of Highbay solutions for warehouses and industrial applications with even more competitive prices than before. Taking into account the high energy price at the moment, the payback time of a Highbay EcoMax, for example, is now less than one year!

	
Luminaire	ECOMAX G2
Total power luminaire (in watts)	200
Number of luminaires*	169
Average light level*	184lx
Investment (Purchase new luminaires, incl. installation costs € 35/ luminaire)	€ 67.938
Annual Energy Cost based on 250 days, 12h/d Energy price € 0.45/KwH	€ 45.630

*Based on project: hall 250m x 80m x 6m

Annual energy savings	
Compared to 2x58W	€ 85.007
vs. HID 400W	€ 81.378
ROI vs. 2x58W	0,80 year
ROI vs. HID 400W	0,83 year

Next year all (compact) fluorescent lamps will be phased out. OPPLE Lighting offers a good, better and best solution to replace the old lighting with LED in the different segments.

Applications	Conventional light source	OPPLE Solutions		
		GOOD	BETTER	BEST
Offices & Schools 		T8 Tube 	Slim Panel Performer 	Slim Panel Performer 
		Downlight Compact 	Downlight Performer 	Downlight Performer 
Warehouse & Production 	CFL Phase-out Feb 2023	T8 Tube 	Waterproof Performer 	Waterproof Performer 
		Highbay EcoMax 	Highbay Performer 	Highbay Performer 
		Waterproof EcoMax 	Trunking 	Trunking 
Parking 		T8 Tube 	Waterproof Performer 	Waterproof Performer 
Others		Filament lamps & Clio Modules 		

You can replace fluorescent lamps one-to-one with LED T8 tubes. This is a **good solution**.

A number of conditions apply to this replacement:

- Only suitable for an EM ballast
- Only to be used with a LED dummy starter
- The tubes can NOT be connected in series

A **better solution** would be to replace the complete luminaire including lamp with an LED luminaire. This can be done one-on-one without any modifications to the installation.

The **best solution** is to replace the complete luminaire including lamp with a SMART LED luminaire. Even then no modification to the installation or wiring is required. In combination with Smart sensors, savings of up to 70% can be realized compared to the old situation.
